

## CLIFTON METHFEST

This Saturday, April 7th, join us at the Triple Tree Tavern in Clifton for the first Clifton Methfest! Fun for the whole family, from career criminals to little high school spinnarettes.

There will be a reverse parade, where the parade stands still, and the crowd walks around and among it.

There will be an obstacle course. Participants break a window, grab a stereo, jump back out, dash down the street, under a barbed wire fence, through a cow pasture, all with a police dog nipping at your heels!

Don't miss the "Miss Clifton Meth Smile" competition, with bonus points for brown-stained or missing teeth.

Try your hand at Needle Toss. Pop a balloon with a thrown 1 cc syringe, and win gift certificates for your favorite glassware.

No food will be served, but the beer begins to flow at 8am, so there will be no waiting here. Come help us put the "fun" back into dysfunctional.

In the Senior's Competition, watch old ex-cons and parolees go sphincter to sphincter in the "Stash It In Your Ass" event.

Plan on staying long enough to see the crowning of the Tweeker King and Tweeker Queen. Music provided by the jukebox of the Triple Tree Tavern, turned up real loud.

Event Coordinator, Gary Harmon is already planning next year's event. "With all those beautiful gas fields coming to the valley, meth culture in this valley is going nowhere but up."

For more information, contact Janet Rowland, 434-7771.

### "THREE" FROM FOURTH PAGE

past, or even her supposedly "low" I.Q. . You know something, it's common knowledge that I.Q. doesn't measure crap. Look at our President for example; he supposedly has an I.Q. in the 90's, but he's one of the greatest Americans ever. Ever!

Go ahead and laugh. You're just damning your own souls for making fun of this angel of the Lord. Do you realize that when you make fun of this woman you're making fun of America and everything that we hold dear? You're only emboldening the enemies here at home and abroad. In my America we call that treason.

I'd like to ask all the true Americans out there (not the godless leftist pinkos... Go back to Russia where you belong!) to join me in a moment of silence for this lovely woman.

Thank you. God bless you. God bless America. •

# YOU • SAID • IT

Yes I have spare change. No you can't have it.

To the @\$\$hole who sold me meth instead of cocaine, you owe me three nights of sleep.

For those folks who think we need more traffic circles, go to London where you belong.

To the owner of the dog that shits like a wildebeast in front of my mailbox, would it kill you to pick it up?

This is for those sign holding peaceniks on 12th and North, read the bible once, you'll get over it.

To the lady on 6th and Main, to hell with you, you got a fat ass anyway.

Hey Scum Bay patron, pee in your own backyard.

To all those Indians complaining about whites all the time, go back to where you came from.

## CALL TO INACTION

The Blue Pill wants you not to worry your pretty little head about any of the issues of the world, and encourages every good American to do their part in the war on terror by going back to sleep, watching TV, and buying shit. Fair And Balanced

## FOX NEWS CORP. BUYS RED PILL, NOW BLUE PILL

**F**ox News Corp, the multinational multi-media news corporation, has bought the Red Pill, according to sources within the Red Pill. Although the deal has yet to be made public, it is rumored that Fox News spent a jaw-dropping \$600 dollars.

"We went through our records, and realized that we really hadn't spent that much money on publishing the Red Pill," said one undisclosed source. "I mean, I think we dropped a pretty penny on all that toner—something like \$120 dollars. And then you add in all the paper, beer and band-aids, and you get up to about \$400. And then name rights at \$100. So we actually made out with an extra hundred. I guess we really stuck it to 'em."

The leak then went on to explain how the name would soon be changed over to The Blue Pill. Fox reportedly didn't spend a penny on research. They actually thought that was the name when they first became interested because the only copy they could find had a large amount of soda spilt all over it. They decided to stick with the name so as to not

cause any confusion within Fox.

When asked about the reported deal Fox spokesperson Robert Zimmerman had this to say: "Uhh, I haven't heard of it. No no no, really, I haven't heard of it. I'm not lying! Ah come on guys, this isn't like the other times when I try to pull the wool over your eyes; I really haven't heard of it. What? Six hundred dollars? My Christmas bonus is a hundred times that! Holy shit! What kind of crappy paper is it?"

According to the sources within the Red Pill, workers were unhappy about the shitty pay and hazardous work environments. "Sometimes we would show up and they wouldn't have bought any beer for us. Actually, make that everytime."

I think they only bought beer for us once. Then there were these paper cuts from hell and they never had any band-aids. And then we always had to fold them sitting in these crappy chairs that hurt your back. I think they even pulled them out of the garbage. I hope Fox treats us better; I've heard good things about them." •

## METH GIVES YOU THE ENERGY YOU NEED TO GIVE US ALL THE ENERGY WE NEED

**M**eth use is on the rise in Colorado. For many, it is a performance enhancing drug and increases productivity. Some people say, that meth is one of the hardest drugs to quit. I say, why bother? Take the natural gas drilling industry for example. Drilling for natural gas is also on the rise in Colorado. And what better way to meet our energy needs than to increase productivity and enhance performance. The energy production industry boasts long hours and great pay. Meth is a sustainable way to keep you going so the gears of our energy industry and production run smoothly.

Why should we have to rely on the unstable Middle East for our energy needs? We have all the natural gas we need right here in Colorado. With about 1600 permits issued for Garfield County in 2006 and 275 for Mesa County, we are going to need a work force capable of handling our energy production. We could even kill two birds with one stone and

have the Natural Gas drilling industry provide the much needed meth to their workers.

Meth is the new coffee! It keeps your motor running when your battery is dying. Some worry about the addictiveness of gas, I mean, Meth, but as Bubba Joe says, "I've been taking Meth everyday for about two years. I can quit tomorrow if I want." Take it from the toothless mouth of someone who knows and has been there.

As Americans, we need to support our local industries and put our energy production back into the hands of our natural gas companies, who only have the American People's best interests at heart. If you're thinking about a career in the natural gas industry, or you have family in the natural gas industry. Do what's best for them and for our country, buy local, buy meth.

Meth, when you absolutely positively gotta, Git 'er done.

## ANNA NICOLE SMITH AUTOPSY PICS REVEALED!

The coroner's office released photos of Anna Nicole Smith's autopsy today in a Blue Pill exclusive, saying that they have never seen anything like this. As you can see in the photo below, there seems to be a little demon-like creature eating away at her body. Although the examiners were afraid to initiate any contact with the creature, it appeared to them that it had originally feasted on her soul. When the soul was consumed (although it was fairly small to begin with) it turned on her body. Coroners say this explains the weight loss she experienced in her last years of life. •

## ANNA NICOLE SMITH: AN ANGEL AMONG US

BY: BILL O'RIELEY

I know that many of you leftist, pinko, terrorist sympathizers reading this out there are probably sick of hearing about this goddess amongst women, but goddamn it, if you can't spare a brief moment of your time to pay homage to a true American icon then God help your immortal (immoral?) souls.

Sure a lot of you slackers (and god help us, voters) like to only remember Anna Nicole for some of the negative press she has gotten in the liberal-run media over the years; her day's as a playboy centerfold, a "controversial" marriage to a wealthy older gentleman (damn it people, love is ageless) who passed away not too long into their holy union, the drawn out court hearings dealing with the wealth Anna Nicole's husband willed her (damn greedy vultures... at least Anna Nicole got her due), her extreme weight gain (which I still thought she was beautiful... So what if your old buddy Bill is a "chubby chaser"... Do you want

to make something of it?), her son's untimely death from a drug overdose (drugs purchased, no doubt, from a foreigner scum bag), and now Anna Nicole's own untimely death...

First of all I'd like to say that fame is enough to drive anyone to the occasional use of recreational drugs. That's one thing the liberal media seems to forget. They prop these stars upon pedestals, placing the world upon their shoulders, and then laugh bitterly when they are crushed under the weight. That's right, I blame you, Jew-run liberal media, for Anna Nicole's death. "Drug overdose" indeed. Where I come from we call it murder. These people who profit from satire off this tragic event are just as responsible for killing Anna Nicole as are various late-night so-called comedians. I say we hang them all in the streets.

Sure, make fun of this angel's troubled
